

Community Plan for a Sustainable Future CWG report – March 2024

With the agreement of the Executive, the CWG engaged an editor to reshape the two draft documents that Locale provided late last year. These are the draft Planning for a Sustainable Future Community Plan and the draft Engagement, Findings and Directions report. We did this in order to get a more coherent and concise summary of the community consultation process and a better refinement of the strategic plan. The CWG apologises to our members that we were unable to post the final draft community plan to the website by the planned date of January 31st.

The editor, Julie Martin, has now produced a more streamlined version of the strategic plan. It includes a community focussed set of actions that were devised from the survey results and discussed in a workshop with the RHVA Executive on the 27th February.
