Dear Jason

Re: Presentation on Community-led Resilience Teams

On behalf of the Red Head Villages Association (RHVA) I thank you for your generosity in providing much detail on the CRT concept both to myself and Belinda Maxwell, and for agreeing to speak to our local residents. Our community is interested in finding out more about CRTs as we build our resilience ahead of future emergencies such as fire.

The RHVA is the Community Consultative Body (CCB) recognized by Shoalhaven City Council as the forum which represents issues and concerns for the communities of Cunjurong Point, Bendalong, North Bendalong, Berringer Lake and Manyana. We refer to our villages as the 5 villages or the Red Head villages.

I am aware that Belinda has already asked you for your availability to present on the CRT model to our RHVA community network and that the **16th May from 2-3pm** would work for you. If this time is not suitable can you please let me know. We will also invite representatives from our emergency services and other local community groups. Refreshments will be provided after the presentation and we invite you to stay for a while to chat informally with us and members of the community. Belinda and I will liaise with you on associated details and arrangements as we approach the presentation.

We look forward to meeting you and progressing the establishment of our own CRT.

Kind regards

Kerry Moore
Secretary RHVA Inc
